

Hossein Emami

PRODUCT DESIGNER

Portfolio: hossein-em.github.io

linkedin.com/in/hosseinem · Hosseinem77@gmail.com · Tehran, Iran · +98 936 463 7537

Product Designer with a background in computer software engineering, which gives me a systematic read on product systems and technical constraints. I handle the whole research and design process, making sure decisions are validated along the way. My focus is on connecting user needs and business goals to design decisions that deliver real business value.

EXPERIENCE

Product Designer

Collaborative project with Ravan-Darman Mental Health Platform

Tehran | Dec 2025 – Feb 2026

- Worked across the strategy and design of group-based mental health experiences within a real-world therapy platform.
- Ran mixed-method research (8 interviews, 90 survey responses) to identify trust, engagement, and adoption barriers.
- Elevated the team's survey analysis into statistical testing in SPSS, producing the most evidence-backed insights that shaped the project's final findings.
- Led research synthesis, turning interviews and survey data into the themes, persona, and key findings behind feature decisions.
- Reframed feature priorities around the real barriers — unfamiliarity and privacy over price — informing onboarding and strategy decisions.
- Shaped the Events and Community concepts with the team, targeting trust-building, engagement, and long-term retention.
- Validated two core flows through Maze testing — set up the scenarios and fixed prototype issues — reaching 95.8% and 100% task completion.

Product Designer

Tiararah — Children's EdTech Startup

Tehran | Jul 2025 – Present

- Sole designer on an early-stage children's education platform (ages 3–16), owning the end-to-end design process from research to handoff.
- Streamlined the interface by consolidating low-impact pages into high-visibility surfaces, reducing fragmentation and simplifying navigation across the platform.
- Translated content and learning goals into interface decisions, shaping how material is presented across the platform.
- Designed responsive experiences across onboarding, dashboards, storytelling, gamified learning, and landing pages.
- Worked closely with project management, engineering, and content teams throughout the design process.
- Introduced engagement patterns inspired by habit-building systems to encourage recurring interaction and retention.

Freelance — Product & Web Design

Tehran

- Music Education Platform: Sole designer for a music education and instrument-sales platform, owning the end-to-end design.
- Additional Web & Branding Projects: Delivered web and branding projects for small businesses, including landing page customization, interface improvements, and visual identity work (banners, logos, icons).

IT Operations Specialist

Ministry of Science, Research and Technology

Tehran | Jul 2023 – Jul 2025

- Worked closely with users and the technical team on a large-scale academic recruitment platform, developing a hands-on understanding of real user problems and the system's technical limitations.
- Deployed and configured Zabbix monitoring on Linux servers, setting up infrastructure tracking and alerting for system health.

SKILLS

Research & Strategy: UX Research, User Interviews, Usability Testing, Statistical Analysis, Research Synthesis, Benchmarking, Product Strategy, Prioritization

Design & Craft: Interaction Design, Information Architecture, User Flows, Wireframing, Prototyping, Visual / UI Design, Design Systems

Technical: Software-engineering foundation, Technical Feasibility, Developer Handoff, Basic Frontend Understanding

Tools: Figma, FigJam, Framer, Maze, SPSS, Adobe Suite, AI Prompting (LLMs)

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Computer Software Engineering

Behbahan Khatam Alanbia University of Technology | 2017 – 2023

Product Design Bootcamp

Rahnema College | 2026 · 80h in-person classes + 180h of study and project work
